EMPOWERING GOVERNMENTS

Advancing Quality Infrastructure Investment by Digitalising Project Development

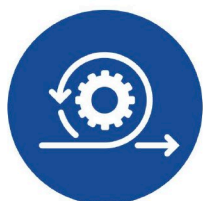

In building resilient societies amidst global challenges, the central pillar is the critical requirement for sustainable infrastructure. However, significant obstacles to progress are the lack of well developed projects and a projected \$15 trillion infrastructure investment gap by 2040, as indicated by the G20.

SOURCE is a MDB-cooperative online software designed to support governments in the:

- development of projects to bridge the infrastructure gap
- digital transformation agenda; and
- mobilisation of public and private finance

What makes SOURCE unique for client countries?

Guides well-informed decision making through a structured approach covering the entire project life cycle for PPPs and traditional procurement

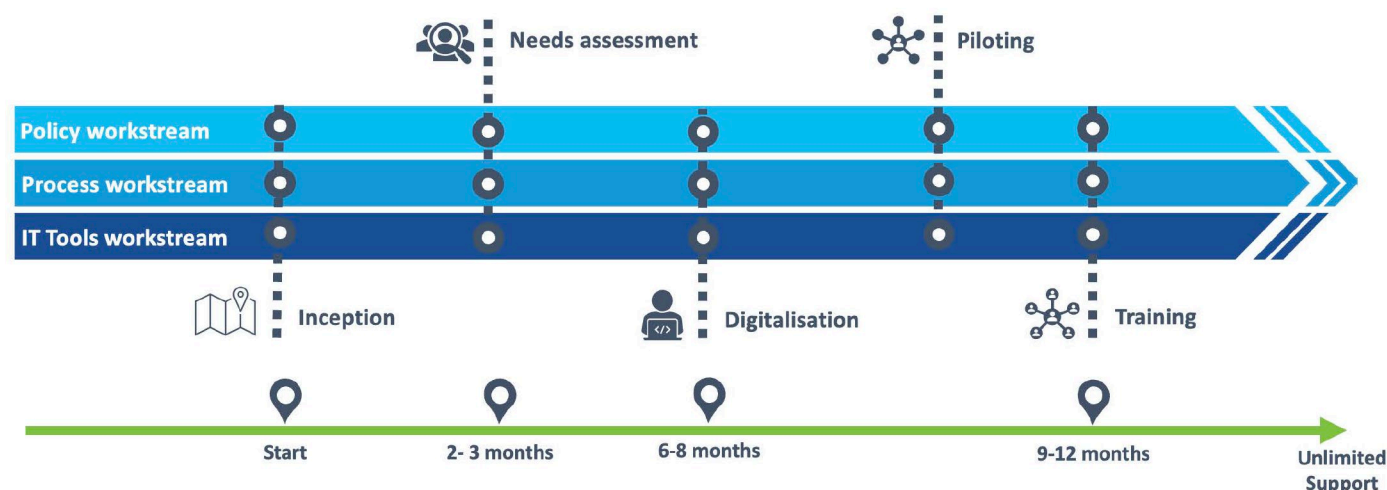

Facilitates multi-stakeholder collaboration and access to international best practices during the development process

Enables domestic and international resource mobilisation by promoting a common understanding between public and private investors

SOURCE integration journey

Technical assistance enables SOURCE to be fully adaptable to each country's processes, evaluation methodology and and inter-operable with complementary IT systems.

SOURCE streamlines international best practices

- UN Sustainable Development Goals
- Paris Agreement (Nationally Determined Contributions)
- G20 Quality Infrastructure Investment principles and indicators
- World Bank Guidance on PPP Contractual Provisions
- World Bank Policy Guidelines for Managing Unsolicited Proposals
- World Bank PPPI Database and benchmarking reports
- World Bank – International Monetary Fund PPP Fiscal Risk Assessment Model tool
- International Finance Corporation Performance Standards
- APMG PPP Certification Guide
- Organization for Economic Co-operation and Development Principles for Public Governance of Public-Private Partnerships
- UNCITRAL Legislative Guide on Public-Private Partnerships
- Inter-American Development Bank Sustainable Infrastructure Criteria
- Global Infrastructure Hub PPP risk allocation matrix
- Equator Principles
- International Labour Organization's Decent Work Agenda
- Asian Development Bank's GRIS methodology
- FAST-Infra Label pre assessment criteria
- UNECE PIERS methodology PPP for SDGs

SOURCE covers the full range of infrastructure sectors:

SOURCE data hosted under United Nations Computing Center servers guaranteeing sovereignty and immunity

Security is at the core of SOURCE, only the project coordinator has the authority to publish data or invite other team members with specific permissions ensuring that information remains strictly confidential

“SOURCE is endorsed by the G20 for spearheading the digitalisation of infrastructure project preparation (2020) and recognised by G7 as an important contributor towards enhancing infrastructure project quality, standards, and governance (2023). ”
